Cartridges Filter

The requirement of the cartridge filter is increasing day-by-day. Keeping in mind the needs we offer a wide range of choice in the filters that include polypropylene cartridge, back washable filter cartridge, SS filament cartridge, hydraulic filter cartridge, etc. These cartridge is fabricated utilizing the best grade materials to suit the requirement of the area of application.

SS Cartridges

This type of cartridge is made using the best quality and grade SS material. They are known in the industrial market for their high performance and durability. The size of the cylinders in the cartridge is kept as per standard measurement and is also customized on the request of client. SS Cartridges are made compatible with reactive acids and caustic fluid varying in their pH value.

Ceramic Cartridge Manufacturer

The ceramic cartridge is used in the industries to filter out small particles whose size is smaller than 0.5 microns. They are preferred in the water purifiers to completely remove the unwanted particles from it. We stand as the top notch ceramic cartridge manufacturer of superior quality that can work efficiently for a long time interval.

Polypropylene Cartridge India

The cartridge is used in various industries to filter the chemicals and focus on removing the unwanted dirt and make the chemical clean. They are offered in various size of length starting from 5" to 40". The dimensions are kept as per the industry specified valve and are even customized as per the need of client. We have gained top reputation in providing the polypropylene cartridge in India in the timeliest manner.
